Our forests are important sources of natural wealth covering one fifth of the country's land area. They supply the timber for the railways, house building and furniture making. They also supply the fuel for cooking and the bamboo for paper making. Medical herbs also come from the forests.

In the olden days our wisemen and philosophers had their ashrams in the forests. These Ashrams were centre of knowledge and wisdom. Unfortunately, forests were ruthlessly cutdown in the past few years. While the forests are disappearing, the demand for timber is growing. We must, therefore protect and develop our forests. "Van Mahotsava is an important step in this direction. It is observed for a week in July every year. During this week lakhs of sapling are planted throughout country. This is being done to restore our fast disappearing forests."

Paraphrase the following poem:

We used to think generations ahead

Now we have become selfish

Only thinking in the present, not learning from the past

We used to stroll barefeet through overgrown grass

It's morning dew tickling our feet

Now we step outside onto the rugged concrete

No more natural than the overprocessed food we eat.
